Mathematics

Note for Grades 1-5 Math: There are two types of homeschool packages available for *Math in Focus*. You may choose either one for your home use. The first one listed comes with an answer key, but not a teacher's guide. The second option listed comes with the teacher guides, which also contain the answers. It is more expensive than the first option. We recommend the second option for those who may not feel equipped to teach this level of math without one.
